PUT YOUR DATA TO WORK

This state-of-the-art intelligent dashboard is designed to identify, inform and impact the quality of data submitted to the IIS.

DATA QUALITY

- Automates reports to track data quality for each provider during the onboarding process.
- Helps set state's expectations and tracks provider's data quality against it.
- Provides specific details about data quality issues and offers steps to correct inaccurate data.

HL7 MONITORING FOR PROVIDERS AND EHR'S

- Improved provider & EHR's specific data quantity monitoring.
- Facilitates states and providers with patient and vaccination records throughout the HL7 lifecycle.
- Accurate visibility regarding patient and vaccination data sent to the state's IIS.

ONBOARDING MODULE

- Customizable onboarding process.
- Supports states in keeping track of providers throughout their onboarding process.
- Electronically creates, sends and collects interface form and other related documents.
- "One stop shop" for all onboarding related information for providers.

Greater Accountability | Impact Outcomes
Increasing data volume and accuracy
means fewer missed opportunities and wasted doses.
