# Ready to Get Started?

## 1.) Complete the Legal/Procedural setup:

eTrueNorth provides a comprehensive set of electronic resources related to CLIA Waived laboratory management including, but not limited to:

- Federal, State and Local regulatory requirements
- Compliance checklists
- Policy and Procedure templates
- Current documentation on state-specific policies

## 2.) Capture data electronically & maintain Quality Control practices

Get ready to capture data electronically and maintain Quality Control practices using the LabLink portal. Features include public health reporting, device inventory, and QC results. Users can easily demonstrate compliance with regulations and generate standard laboratory quality control reports, including audit compliance.

## 3.) Connect to the eLabNetwork

LabLink connects you to the eLabNetwork so you can drive traffic to retail pharmacies for wellness screenings and more.
